

4-21-81

Dr. Shirley Ann Jackson, Chairperson
Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Dr. Jackson,

We need to take appropriate action to stop Louisiana
Energy Services (LES), from constructing and operating a uranium enrichment
facility between the low income African American communities of Forest
Grove and Center Springs, Louisiana.

Uphold and support the decisions of the NRC Licensing Board
and refuse to license the LES uranium enrichment facility. Your help
with this matter is critical to breaking America's shameful pattern of
locating polluting facilities in our low-income neighborhoods &
communities of color.

Sincerely,

Megan MacDowell
