Washington, DC 20555

Subject: Radiation Survey Report of the L-85 Reactor Facility  
Docket No. 50-375

Reference: Rockwell International Letter 86RC03345 dated March 6,  
1986, M. E. Remley to Harold Denton, "Radiation Survey  
Report of the L-85 Reactor Facility Following Disman-  
tlement and Decontamination of the Facility, Docket  
No. 50-375"

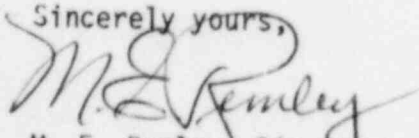

Dear Mr. Denton:

With our letter of March 6, 1986, referenced above, we transmitted the revised radiation survey report for the L-85 nuclear examination reactor for your information and review. The report was in support of our request for a final inspection of the facility prior to voluntary termination of License Number R-118 and release of the facility for unrestricted use.

Unfortunately, the Rockwell proprietary notice was inadvertently added to the title page for the radiation survey report. The title page has now been revised by removal of the proprietary notice and copies of the revised page are enclosed to replace those on the document submitted with our letter of March 6.

If you have questions or need additional information, please call me at (818) 700-4270.

Sincerely yours,

  
M. E. Remley, Director  
Nuclear Safety and Licensing

Keller	LB05	Following cleanup of any previously detected radioactivity exceeding specified limits, a radiation survey was performed throughout the L-85 reactor building (T093) and associated buildings (T083, T074, and T453). The results of this survey show that this facility meets the criteria established by the U.S. Nuclear Regulatory Commission's Regulatory Guide 1.86 and NRC Dismantling Order, Docket No. 50-375, dated February 22, 1983, for release of facilities for unrestricted use.
