Mr. George W. Knighton, Director  
PWR Project Directorate No. 7  
Division of PWR Licensing-B  
Office of Nuclear Reactor Regulation  
Washington, D.C. 20555

SUBJECT: Waterford SES Unit 3  
Docket No. 50-382  
Supplement to the Detailed Control  
Room Design Review Summary Report

REFERENCE: (1) W3P85-1015 dated April 30, 1985  
(2) NRC letter dated October 30, 1985

Dear Mr. Knighton:

By Reference (1) LP&L submitted the Detailed Control Room Design Review (DCRDR) Summary Report. Subsequently, on June 3-6, 1985, the NRC performed a pre-implementation audit of the DCRDR resulting in a Safety Evaluation Report (SER) transmitted by Reference (2). The SER identified three confirmatory issues and requested that LP&L provide a supplement to the Summary Report.

Enclosed please find a supplement to the DCRDR Summary Report for Waterford 3 addressing the three SER confirmatory issues. With this submittal LP&L is confident that the requirements of condition 11 to the Waterford 3 license, as well as the DCRDR requirements of NUREG 0737 Supplement 1, have been met.

Should you require additional information please contact Mike Meisner at (504) 595-2832.

Yours very truly,

K.W. Cook  
Nuclear Support & Licensing Manager
