Docket No. 50-423  
B16525

U.S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, DC 20555

Millstone Nuclear Power Station Unit No. 3  
Revised Schedule  
Calculation Of Hydrogen Recombiner Heater Performance

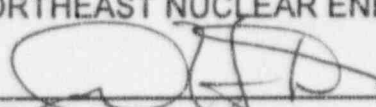

The purpose of this letter is to provide our revised schedule for the completion of corrective actions previously committed to in Licensee Event Report 97-011-00, "Hydrogen Recombiner Heaters Potentially Outside Of Design Basis Under Degraded Voltage Conditions". This extension is necessitated as a direct result of providing the incorrect parameters to Boeing/Rocketdyne with which to perform the calculations committed to within our letter of February 28, 1997. The design parameters provided were based on the original sub-atmospheric pressure containment design. These parameters changed as a result of an increase in containment operating pressure authorized under Amendment 59.

Our revised commitments are provided in Attachment 1.

Should you have any questions regarding this matter please contact Mr. David A. Smith at (860) 437-5840.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY
