Ms. Beth A. Riedlinger
U. S. Nuclear Regulatory Commission, Region V
1450 Maria Lane, Suite 210
Walnut Creek, CA 94596

REF: Control #18997

Dear Ms. Riedlinger:

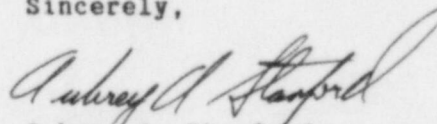

In reply to your letter regarding renewal of our NRC license, the following information is submitted.

The license should continue to name Bonneville Power Administration as the licensee. I will be the contact person within our organization and will assume the management oversight role previously held by David Jackson.

James I. Sutton will continue to be responsible for the radiation safety program. He has been in this role since 1975. I have enclosed a copy of the training which he has received for your records.

If there are any further questions regarding renewal, please contact Patricia Hunter on FTS 425-2390.

Sincerely,

Aubrey A. Stanford
Safety Manager

In reply refer to:

November 11, 1975

SUBJECT: Training and Experience of Mr. James I. Sutton, proposed
Radiation Safety Officer for the Bonneville Power Administration

James I. Sutton, Jr., received 24 hours classroom instruction in the principles and practices of radiation protection and biological effects of radiation during August, 1946, with the U.S. Navy Ammunition Disposal Unit Kwajalein. From August 29, 1946 to November 21, 1946, Mr. Sutton worked with an ammunition disposal team removing ammunition from radioactive ships that had been used in atomic bomb tests during Operation Crossroads. During this period radiation protection principles and decontamination procedures were effected on a regular basis.

Mr. Sutton will receive eight hours of classroom and field instruction in the safe operation, storage and monitoring of the nuclear density gauge. This instruction is scheduled to occur in Vancouver, Washington on December 10, 1975.

For the past three years Mr. Sutton has served as the Safety Manager for the Bonneville Power Administration construction program.

Certificate of Training

This is to certify that JAMES SUTTON
has satisfactorily completed Nuclear Density Training Course
at Vancouver, Washington on December 10, 1975.

Dated 12/10/75

John J. Mizar
Instructor

Form FHWA-33 (Rev. 3-68)

DESCRIPTION OF COURSE

This is a basic training course for the operation and use of Nuclear Density/Moisture Gauges. Included was a thorough orientation regarding the knowledge of radiation hazards associated with the gauge and methods of monitoring them. Some of the major topics were: General Operating Instructions, Troubleshooting Procedures, Employee Responsibility, Safety Precautions in Operating, storing and Use of the AEC Film Badge.
