

OFFICE OF THE
SECRETARY

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

May 7, 1997

IN RESPONSE, PLEASE
REFER TO: M970423A

MEMORANDUM TO: L. Joseph Callan
Executive Director for Operations

FROM: *John C. Hoyle*
John C. Hoyle, Secretary

SUBJECT: STAFF REQUIREMENTS - BRIEFING ON MILLSTONE,
10:00 A.M., WEDNESDAY, APRIL 23, 1997,
COMMISSIONERS' CONFERENCE ROOM, ONE WHITE
FLINT NORTH, ROCKVILLE, MARYLAND (OPEN TO
PUBLIC ATTENDANCE)

The Commission was briefed by the licensee on the status of corrective actions and restart activities and by the NRC staff regarding ongoing regulatory oversight of the Millstone units.

In order to support a Commission decision on the restart of the Millstone units, the Commission requested that the licensee provide more detailed information concerning Millstone activities including, but not limited to, status of restart issues and measures used to monitor performance including associated trends and supporting data. The Commission requested that the licensee supply this information to the Commission as a supplement to this briefing. In addition, the Commission would expect that updated versions of this information would be supplied as a briefing package at least 1 week prior to each subsequent Commission briefing on Millstone activities.

The staff should work with the licensee and SECY to establish a Commission meeting format and agenda that will support a focused discussion and, ultimately, a timely Commission decision on the restart of the Millstone units.

(EDO/SECY)

(SECY Suspense: 6/30/97)

Before the next quarterly Commission meeting on Millstone activities, the staff should provide the Commission with an estimate of the total resources (FTE and contract support) required to support the Millstone restart efforts. This estimate should indicate the source of the NRC resources (e.g., Region II, NRR, AEOD) and describe the potential impact, if any, on other NRC inspection activities or regulatory programs.
