

MATERIALS LICENSE

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 39, 40 and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Licensee

1. Department of the Army
Rocky Mountain Arsenal
2. ATTN: AMXRM-SHE
Commerce City, Colorado 80022-2180

In accordance with letter dated
April 29, 1997
3. License number 05-07157-02 is amended in
its entirety to read as follows:

4. Expiration date March 31, 2005

5. Docket or
Reference No 030-11918

6. Byproduct, source, and/or
special nuclear material

A. Nickel-63

7. Chemical and/or physical
form

A. Foils or plated
sources registered
either with NRC under
10 CFR 32.210 or with
an Agreement State and
incorporated in a
compatible gas
chromatograph as
specified in Item 9 of
this license

8. Maximum amount that licensee
may possess at any one time
under this license

A. See Condition 9.A.

9. Authorized use

- A. To be used for sample analysis in Chemical Agent Monitors and compatible gas chromatography devices that have been registered either with NRC under 10 CFR 32.210 or with an Agreement State and have been distributed in accordance with an NRC or Agreement State specific license authorizing distribution to persons specifically authorized by an NRC or Agreement State license to receive, possess, and use the devices.

CONDITIONS

10. Licensed material shall be used only at the licensee's facilities located at Rocky Mountain Arsenal, Building 130, Commerce City, Colorado.

Amendment No. 11

11. A. Licensed material shall be used by, or under the supervision of, Starr Graff.
B. The Radiation Safety Officer for this license is Starr Graff.
12. Detector cells containing licensed material shall not be opened or the foil sources removed from the detector cell by the licensee.
13. A. Sealed sources and detector cells shall be tested for leakage and/or contamination at intervals not to exceed 6 months or at such other intervals as specified by the certificate of registration referred to in 10 CFR 32.210.
B. In the absence of a certificate from a transferor indicating that a leak test has been made within 6 months prior to the transfer, a sealed source or detector cell received from another person shall not be put into use until tested.
C. Sealed sources need not be leak tested if:
 - (i) they contain only hydrogen-3; or
 - (ii) they contain only a radioactive gas; or
 - (iii) the half-life of the isotope is 30 days or less; or
 - (iv) they contain not more than 100 microcuries of beta and/or gamma emitting material or not more than 10 microcuries of alpha emitting material; or
 - (v) they are not designed to emit alpha particles, are in storage, and are not being used. However, when they are removed from storage for use or transferred to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source or detector cell shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.
D. The leak test shall be capable of detecting the presence of 0.005 microcurie of radioactive material on the test sample. If the test reveals the presence of 0.005 microcurie or more of removable contamination, a report shall be filed with the U.S. Nuclear Regulatory Commission in accordance with 10 CFR 30.50(b)(2), and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations. The report shall be filed within 5 days of the date the leak test result is known with the U.S. Nuclear Regulatory Commission, Region IV, 611 Ryan Plaza Drive, Suite 400, Arlington, Texas 76011, ATTN: Director, Division of Radiation Safety and Safeguards. The report shall specify the source involved, the test results, and corrective action taken.

Amendment No. 11

- E. The licensee is authorized to collect leak test samples for analysis by Fitzsimons Army Medical Center. Alternatively, tests for leakage and/or contamination may be performed by persons specifically licensed by the Commission or an Agreement State to perform such services.
14. Maintenance, repair, cleaning, replacement, and disposal of foils contained in detector cells shall be performed only by the device manufacturer or other persons specifically authorized by the Commission or an Agreement State to perform such services.
15. The licensee shall conduct a physical inventory every 6 months to account for all sources and/or devices received and possessed under the license.
16. In addition to the possession limits in Item 8, the licensee shall further restrict the possession of licensed material to quantities below the minimum limit specified in 10 CFR 30.35(d) for establishing decommissioning financial assurance.
17. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.
- A. Application dated May 20, 1993
B. Letter dated May 25, 1993
C. Letter dated March 23, 1995
D. Letter dated March 12, 1997

SUBJECT: LICENSE AMENDMENT

Please find enclosed License No. 05-07157-02. You should review this license carefully and be sure that you understand all conditions. If you have any questions, you may contact the reviewer who signed your license at 817-860-8132.

NRC expects licensees to conduct their programs with meticulous attention to detail and a high standard of compliance. Because of the serious consequences to employees and the public which can result from failure to comply with NRC requirements, you must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers: Inspection and Investigations," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address (no fee required if the location of radioactive material remains the same).
5. Request and obtain written NRC consent before transferring your license or any right thereunder, either voluntarily or involuntarily, directly or indirectly, through transfer of control of your license to any person or entity. A transfer of control of your license includes not only a total change of ownership, but also a change in the controlling interest in your company whether it is a corporation, partnership, or other entity. In addition, appropriate license amendments must be requested and obtained for any other planned changes in your facility or program that are contrary to your license or contrary to representations made in your license application, as well as supplemental correspondence thereto, which are incorporated into your license. A license fee may be charged for the amendments if you are not in a fee-exempt category.

6. Maintain in a single document decommissioning records that have been certified for completeness and accuracy listing all the following items applicable to the license:
 - Onsite areas designated or formerly designated as restricted areas as defined in 10 CFR 20.3(a)(14) or 20.1003.
 - Onsite areas, other than restricted areas, where radioactive materials in quantities greater than amounts listed in Appendix C to 10 CFR 20.1001-20.2401 have been used, possessed, or stored.
 - Onsite areas, other than restricted areas, where spills or other unusual occurrences involving the spread of contamination in and around the facility, equipment, or site have occurred that required reporting pursuant to 10 CFR 30.50(b)(1) or (b)(4), including areas where subsequent cleanup procedures have removed the contamination.
 - Specific locations and radionuclide contents of previous and current burial areas within the site, excluding radioactive material with half-lives of 10 days or less, depleted uranium used only for shielding or as penetrators in unused munitions, or sealed sources authorized for use at temporary job sites.
 - Location and description of all contaminated equipment involved in licensed operations that is to remain onsite after license termination.
7. Submit a complete renewal application with proper fee, or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
8. Request termination of your license if you plan to permanently discontinue activities involving radioactive material.

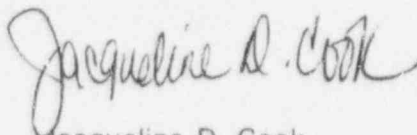

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the "General Statement of Policy and Procedure for NRC Enforcement Actions" (Enforcement Policy), 60 FR 34381, June 30, 1995.

SUBJECT: ACKNOWLEDGMENT OF REQUEST FOR LICENSING ACTION

REFERENCE: LETTER DATED APRIL 29, 1997

We have completed the administrative review and initial processing of your application.

During the initial processing, no omissions/deficiencies were identified. Please note that the technical review may identify additional omissions in the submitted information or technical issues that require additional information.

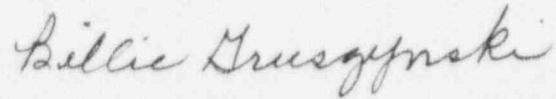

Amendment actions are normally processed within 60 days, unless the technical review identifies:

- Major technical deficiencies
- Decommissioning/decontamination activities are required before an application can be completed
- Confirmatory closeout surveys after decontamination/decommissioning activities are required before a license can be terminated or a facility removed from the license
- Policy issues are identified that require input and coordination with other NRC Regional offices, Agreement State offices, or NRC's Office of Nuclear Materials and Safeguards

A copy of your correspondence has been forwarded to our License Fee and Accounts Receivable Branch, Office of the Controller, who will contact you separately if the appropriate license fee has not been submitted for your request, or for billing if your request is subject to full cost recovery.

Any correspondence about this application should reference the Control number listed below.

Sincerely,

A handwritten signature in cursive script that reads "Billie Gruszynski".

U.S. Nuclear Regulatory Commission
Region IV
Material Radiation Protection Section
611 Ryan Plaza Drive, Suite 1000
Arlington, TX 76011

Dear Sirs:

The Program Manager Rocky Mountain Arsenal (PMRMA) is applying to amend its NRC License, 05-07157-02, and document the following changes in personnel: Items 11, A and B.

Ms. Starr Graff has been assigned as our Radiation Protection Officer (RPO) effective immediately. She is replacing Gregory Condon who is presently listed on our Radioactive Materials License. Licensed material shall be used by, or under the supervision of Ms. Graff.

Documentation of Ms. Graff's professional experience is attached. In addition, she will be attending Troxler's "Nuclear Gauge Safety Training" course on June 4, 1997 and the "Radiation Safety Officer" course on June 5, 1997. Copies of both Troxler's course certificates will be forwarded to you upon course completion.

If you have any questions concerning our NRC license amendment, please contact Ms. Graff at (303) 289-0541.

Sincerely,

Eugene H. Bishop
Colonel U.S. Army
Program Manager

OBJECTIVE

To further expand my already strong and diverse Environmental, Health, and Safety career.

PROFESSIONAL SUMMARY

Over fourteen years of experience in multi-disciplinary environmental, health, safety and remediation projects. Prepared planning documents, site environmental, health and safety plans/programs, and final reports for both private and government worksites. Experience includes the following:

- ◆ Ensure regulatory compliance pertaining to OSHA, EPA, RCRA, TSCA, CERCLA, SARA, NPDES, NFPA, DOT, Army Regulations, Department of Army Pamphlets, Army Technical Document, State and Local Regulations;
- ◆ Possess technical and project management experience in hazardous materials emergency response up to On-Scene Incident Commander;
- ◆ Twelve years experience in the semiconductor industry;
- ◆ Experience in hazardous waste site evaluations;
- ◆ Conducted facility audits, inspections and evaluations;
- ◆ Radiation Protection Officer for Superfund Site;
- ◆ Developed, maintained, and supervised a multi-media Industrial Hygiene Program;
- ◆ Reduced workplace liabilities through the implementation of waste reduction, Ergonomic Programs, Light Work Programs and Worker Compensation Case Management;
- ◆ Establish, maintain, and instruct various environmental, health and safety training programs.

EDUCATIONAL SUMMARY

Master of Science Degree in Environmental Engineering, Columbia Southern University	October 1997
Bachelor of Science Degree in Occupational Safety and Health Engineering, Columbia Southern University	1996
Associate of Applied Science Degree in Risk and Safety Management, Pikes Peak Community College	1990

Certified Environmental Compliance Manager (CECM) Certification	1995-Present
8-Hour HAZWOPER Refresher Certification	1995-Present
ISO 14000	1997
CAMEO Risk Management System	1997
Hazardous Analysis for Hazardous Waste Operations	1996
Advance Safety Concepts	1995
DOT Compliance: Hazardous Materials Storage and Transportation	1995
40-Hour HAZWOPER Certification	1994
Hazardous Material First Responder	1992
Dupont Safety, Health, and Environmental Assurance Training	1992
40-Hour Ergonomics Course	1992
Advance Industrial Hygiene Training	1992
Basic Industrial Hygiene Training	1990

COMPUTER KNOWLEDGE

PC/IBM Compatible 486	Macintosh 6100/60	Lotus 1-2-3
Microsoft Office (Word, Excel, PowerPoint)	Harvard Graphics	WordPerfect
Microsoft Access	QV Link	CAMEO

PROFESSIONAL EXPERIENCE

SAFETY AND ENVIRONMENTAL ENGINEER, Rocky Mountain Arsenal (RMA) Superfund Site

Research Management Consultants, Inc. (RMCI), Golden, CO

Management Assistance Corporation of America (MACA), Denver, CO

1994 - Present

- ◆ Developed and published RMA's Health and Safety Plan/Program (HASP).
- ◆ Regulatory compliance pertaining to OSHA, EPA, RCRA, TSCA, CERCLA, SARA, NPDES, NFPA, DOT, Army Regulations, Department of Army Pamphlets, Army Technical Document, State, and Local Regulations.
- ◆ Establish, maintain, and instruct various environmental, health, and safety training programs.
- ◆ Radiation Protection Officer for the Rocky Mountain Arsenal.
- ◆ Developing and implementing a Computerized Risk Management System.
- ◆ Maintain the Respirator Protection Program.
- ◆ Conduct environmental, health and safety inspections and audits of worksite operations.
- ◆ Accountable for office operations and management of corporate affairs related to MACA's Denver Office.
- ◆ Reviewed and updated RMA's Storm Water Pollution Prevention Plan (SWPPP).
- ◆ Assisted in the development and distribution of the RMA Risk Matrix of intrusive and non-intrusive hazards.
- ◆ Reviewed and updated the RMA Emergency Contingency Plan.
- ◆ Active member of the Internal Explosive Ordnance Assessment Team.

ENVIRONMENTAL ENGINEERING TECHNICIAN

Environmental Services Division, CS Utilities Services Department, Colorado Springs, CO

1993 - 1994

- ◆ Monitored the Air Quality Monitoring Network (AQMN).
- ◆ Assisted with the Continuous Emissions Monitoring (CEM) Certification Test Notices and CEM Monitoring Plans.
- ◆ Developed the 1993 - 1994 Pollution Forecasting Summary.
- ◆ Contributed in the set-up of the AQMN Database in the Environmental Protection Agency (EPA) Aerometric Information Retrieval System (AIRS).
- ◆ Developed and updated various manuals and procedures ensuring environmental regulatory compliance.
- ◆ Initiated the SARA Title III Compliance Program.
- ◆ Assisted with required Phase I and Phase II Environmental Assessments.
- ◆ Developed the department's Phase I Environmental Assessment Manual in accordance with ASTM.
- ◆ Collaborated in the development of the Standard Operating Procedures for Phase I Environmental Assessments.
- ◆ Researched the Hazardous Air Pollutants (HAPS) for required Air Pollutants Emission Notices (APENS).

SAFETY AND INDUSTRIAL HYGIENE TECHNICIAN

United Technologies Microelectronics Center (UTMC), Colorado Springs, CO

1981-1992

- ◆ Supervised and trained the Emergency Response Team.
- ◆ Established and maintained a comprehensive Industrial Hygiene Program.
- ◆ Assisted the Occupational Health Nurse with necessary monitoring programs.
- ◆ Collaborated in the development of the UTMC Americans with Disabilities Act Program.
- ◆ Incorporated a Total-Quality-Management (TQM) Safety Program, to include training, inspections, and audits.
- ◆ Ensured Federal, State and Local environmental, health, and safety governmental compliance.
- ◆ Shipped hazardous waste in compliance with RCRA Part B Permit requirements.
- ◆ Effectively managed the Radiation Program that included a 12,000 curie source.
- ◆ Prepared, coordinated, and conducted environmental, health, and safety training programs.
- ◆ Initiated, maintained, and supervised UTMC's Ergonomic Program.
- ◆ Assisted in the development of the Respiratory Protection Program.
- ◆ Promoted a progressive Recycling and Energy Conservation Program.

RSO Training

Troxler Electronic Laboratories, Inc. also offers advanced training for the Corporate Radiation Safety Officer at a variety of locations. Based on current U.S. Nuclear Regulatory Commission and U.S. Department of Transportation regulations, this course is directed toward the individual responsible for radiation safety and regulation implementation in your organization. This one day course starts at 8:00 a.m. and offers comprehensive coverage of radiological practices, regulations, licensing, leak testing, transportation, personnel monitoring, record keeping and accident response. A complete manual will be provided for course work and future reference, along with certification of course attendance.

Attendees should have completed a certified Nuclear Gauge Safety Training Course.

Cost is \$375.00 per person, payment in advance.

Please use the form provided on the back of this flyer to register for either the RSO Training or Nuclear Gauge Safety Training course.

RSO Training Schedule - Second Quarter 1997

April	30	Seattle, WA	Best Western Exec. - 20717 Pacific Hwy. S.	(206) 878-3300
May	8	Brookline, MA	Holiday Inn Brookline - 1200 Beacon St.	(617) 277-1200
May	22	Arlington, TX	Troxler Facility - 2000 E. Randoll Mill Rd., suite 611	(817) 275-0571

June	19	Santa Ana, CA	Ramada Grand Plaza - 2726 S. Grand Ave.	(714) 966-1955

Nuclear Gauge Safety Training

Troxler Electronic Laboratories, Inc. will conduct nuclear gauge safety training seminars at each of the following locations during the Second Quarter of 1997. This one-day course satisfies Nuclear Regulatory Commission and Agreement State Requirements for gauge operator and radiation safety officer certification, as well as the US DOT training requirement of 49CFR172, subpart H.

Cost is \$139.00 per person for up to four (4) people, and \$119.00 per person for five (5) or more.

Payment is in advance by check or credit card. Cost is \$150 per person on the day of the class or for billing against your purchase order. Your registration should reach us at least five business days before the date of the class. Since we cannot send confirming letters for training classes, please copy the registration form for your files.

All classes begin at 8:00 a.m. and will emphasize the 3400 Series Moisture/Density Gauges. If you are using a different gauge, please indicate the model number on your registration form. A quiz will be given, with a minimum passing score required for certification.

If you have prepaid and cannot attend a class, we will issue a credit for the training which is valid for one year.

Eastern Schedule - Second Quarter 1997

April	3	RTP, NC	Troxler Facility - 3008 Cornwallis Rd.	(919) 549-8661
April	8	Tallahassee, FL	LaQuinta Tallahassee South - 2850 Apalachee Pkwy.	(904) 878-5099
