Ms. Beth Riedlinger
U.S. Nuclear Regulatory Commission
Region V
1450 Maria Lane
Walnut Creek, CA 94596-5368

Dear Ms. Riedlinger:

Enclosed are two copies of a byproduct materials license amendment. In this application we are requesting permission to possess a maximum of twenty (20) sealed sources for use with the bone densitometer described below. At any one time, one source will be in the machine. The others will be maintained at the facility in proper storage.

This equipment, the OsteoAnalyzer Model No. SPSH110, was manufactured by Osteon, Inc. It has been approved by the Nuclear Regulatory Commission for general medical use under certificate No. NR-525-D-101-S.

Sincerely,

Gary K. Kajiura
Senior Vice President
