MAR 27 1986

Texas Utilities Generating Company  
ATTN: Mr. W. G. Council  
Executive Vice President  
400 North Olive, L.B. 81  
Dallas, Texas 75201

Gentlemen:

This refers to the inspection conducted by Mr. T. F. Westerman and other members of the Region IV Comanche Peak Group during the period January 1 through March 14, 1986, of activities covered by NRC Construction Permits CPPR-126 and CPPR-127 for the Comanche Peak Steam Electric Station, Units 1 and 2.

Areas examined during the inspection included procurement and installation/modification practices associated with electrical penetration assemblies furnished by Bunker Ramo Corporation. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. These findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities appeared to be in violation of NRC requirements and one activity appeared to deviate from commitments made to the NRC. The results of the inspection are documented in the enclosed inspection report. As discussed in our telephone conversation of March 25, 1986, with Mr. Barker of your staff, we have scheduled an enforcement conference in our office at 10:00 a.m. on April 3, 1986, to discuss your understanding of these apparent violations and deviation, the reasons for occurrence, and your corrective actions if appropriate.

Sincerely,

Original Signed By  
E. H. Johnson

E. H. Johnson, Director  
Division of Reactor Safety  
and Projects
