Subject: Amendment to Warner-Lambert License #21-01443-06

Please make the following amendment to the Material License held by Warner-Lambert Pharmaceutical Research Division.

Item 5

Change: Carbon 14, 5 curies

To: Carbon 14, 10 curies

Increased activities in our Radiochem Lab has increased our inventory of carbon 14 to a level close to the present 5 curie limit. Several projects have been delayed because of the restrictions. Raising the limit to 10 curie will allow continued uninterrupted work in the lab.

The amendment will stay in effect after the renewal of our license, which is being processed by your office at the present time.

Please contact me at (313) 996-7115 for additional information.

Thank you.

George Kreick
