Re: Kr-85 gasification application - Control No. 60280

Dear Mr. Whitten,

After consultation with the concerned parties at the Western Research Institute (WRI), a decision has been made to withdraw that part of the amendment application addressing the use of Kr-85 gasification applications in the field. WRI personnel have concluded that applications in the field are so varied that a "generic" application would be inappropriate. Field applications also require a considerable planning period so that sufficient time could be allotted to the amendment process.

Thank you for your time and consideration.

Sincerely,

John E. Doerges
