RE: Docket No. 50-231
License No. DR-15

Dear Dr. Morris:

Proposed Change No. 2 to the SEFOR Technical Specifications, submitted on June 12, 1970, proposes certain administrative changes and one change of a technical nature. General Electric hereby requests review and approval of Proposed Change No. 2 so that planned administrative changes can be completed in an orderly fashion. If necessary, review and approval of the technical question involving pump-around-loop flow rate can be deferred until a later date.

Very truly yours,

Karl Cohen
General Manager
