Ms. Jenny M. Johansen, M.S.
Nuclear Material Safety, Section B
Division of Radiation Safety and Safeguards
U.S. Nuclear Regulatory Commission
Region I
631 Park Avenue
King of Prussia, PA 19406

Dear Ms. Johansen:

Enclosed are the original plus one photocopy of a byproduct materials license amendment application. In this amendment application we are requesting permission to possess a maximum of three (3) sealed sources for use with the bone densitometer described below.

This equipment, the OsteoAnalyzer Model No. SPSHA110, was manufactured by Osteon, Inc. It has been approved by the Nuclear Regulatory Commission for general medical use under NRC certificate No. NR-525-D-101-S.

A detailed description of the OsteoAnalyzer is included in the enclosed photocopy of the NRC Custom Device Certificate for this device. Isodose curves are included in the material submitted for Item 10 of the NRC Form 313.

I wish to preserve the previous amended license in regard to Items 6,7,8,9 and 10, except in Item 10, to delete Suite 309, 1650 Huntingdon Pike; and to add Suite 118, Holy Redeemer Hospital Office Building, 1650 Huntingdon Pike, Meadowbrook, PA 19046. I would also like to have the ten mile radius for Hemodialysis Centers increased to a twenty mile radius, but preserve the nursing home centers within a fifty mile radius.

Thank you.

Sincerely,

Walter D. Reese M.D.
Walter D. Reese, M.D.
