Mr. Bernard F. Saffell, Jr.
Battelle Columbus Laboratory
505 King Avenue
Columbus, OH 43201

Dear Mr. Saffell:

This letter gives the U.S. Nuclear Regulatory Commission's approval for Battelle Columbus Laboratories to distribute, without cost to the NRC, manuals, listings, and tapes for the following computer codes:

Source Term Code Package
MARCH
TRAP-MELT
MERGE
CORSOR
MATADOR
QUICKM

These codes may be distributed to any U.S. party upon written request to BCL provided that the requestor states that the codes are not being obtained on behalf of a foreign interest. Requests from foreign parties or on behalf of foreign interests should be referred to the NRC.

We understand and agree with Battelle's intent to recover the costs of this code distribution activity directly from the requestors. We further understand that these charges would include direct costs for time and materials plus up to two hours of anticipated consulting time, and that these charges would usually be less than \$1,000.

Sincerely,

Original Signed by

M. Silberberg, Branch Chief
Fuel Systems Research Branch
Division of Accident Evaluation
Office of Nuclear Regulatory Research
