Dear Sirs:

SUBJECT: Amendment to NRC license #21-24447-01 to add Gadolinium
Source GD-153 for use in the Lunar DP-3 spine/femoral scanner.

We are requesting an amendment to our license #21-24447-01 to add Gadolinium-153 seal source series for use in the Lunar Radiation Corporation Dual-Photon Spine Scanner, DP3. We would like the limit of activity to be two curies of Gadolinium-153. The activity limit would include up to two Gadolinium sealed sources to be on hand at any one time.

We will use the Gadolinium Source 153 according to the user instructions supplied by Lunar on the use of the DP3 scanner. These sources will be purchased from any one of the approved suppliers of Gadolinium-153 sealed sources for spine scanners.

The spine scanner will be used in the patient injection and waiting room in the Radiology Department in the Reichert Building (see original license application).

If you have any questions please contact me at area code (313) 572-3597.

Sincerely,

Jeffrey T. Colvin, MS
Radiological Physicist, ABR

Jeffrey Sust, President
McAuley Clinic Corporation
