

Pacific Northwest National Laboratory

Operated by Battelle for the U.S. Department of Energy

14 March, 1997

Mr. James Wilson
U.S. Nuclear Regulatory Commission
Office of Nuclear Reactor Regulation
OWFN 10 H-5
11555 Rockville Pike
Rockville, MD, 20852

Dear Mr. Wilson,

We have attached 2 copies of the final document "Threatened and Endangered Species Evaluation for 75 Licensed Nuclear Power Generating Plants" (PNNL-11524). This document constitutes the Pacific Northwest National Laboratory (PNNL) deliverable for Milestone 6, "Final Technical Evaluation Report", for Task Order No. 15 - Endangered Species Review Activities Support (TAC # M88282) - under Job Code Number J-2028.

In addition to the Final Technical Evaluation Report, we have attached a description of the database files created to support this task, five IBM-PC formatted disks that contain electronic versions of the final report in both WordPerfect 5.1 and Microsoft Word 6.0 formats, and copies of the database files in both DBF and Microsoft Access formats. We have also attached 2 copies of a supplemental data compendium for Task 15, which includes database print-outs, copies of letters received from the U.S. Fish and Wildlife Service and the National Marine Fisheries Service, and other supplemental information for each site.

If you have any questions regarding this document please contact me on (509) 376-2554, or Dr. Van Ramsdell on (509) 372-6316.

Sincerely,

Dr. Michael R. Sackschewsky
Research Scientist
Ecology Group
Land and Water Resources Department
Pacific Northwest National Laboratory

P&C-1-3 Labs
