Dear Sir:

This responds to the violation noted during the inspection of Anniston Army Depot 4-6 March 1997 regarding the lack of formal authorization of the health physics laboratory there to perform wipe tests for record on M43A1 chemical agent detectors under the BML 12-00722-13 License and Chemical Agent Monitor 12-00722-14 License.

We request amendment to the above licenses to include this facility as an authorized wipe test analysis site. We have performed a review of the quality assurance methods used at Anniston Army Depot Laboratory and find them consistent with license requirements.

We intend to add other Army laboratories and will do so as we review the facility instrumentation and the quality assurance procedures used in those locations.

The point of contact for this action is Mr. Jeff Havenner (309) 782-2965.
