

MATERIALS LICENSE

Amendment No. 14

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

Licensee

1. Department of the Army  
U.S. Army Armament and Chemical  
Acquisition and Logistics Activity
2. ATTN: AMSTA-AC-SF  
Rock Island, IL 61299-7630

In accordance with letter dated  
May 12, 1997  
3. License Number SUB-1340 is amended  
in its entirety to read as follows:

4. Expiration Date February 28, 1995

5. Docket or  
Reference No. 040-08700

6. Byproduct, Source, and/or  
Special Nuclear Material

7. Chemical and/or Physical  
Form

8. Maximum Amount that Licensee  
May Possess at Any One Time  
Under This License

A. Uranium-238

A. Plated sources

A. 10 kilograms

9. Authorized Use:

- A. For storage only incident to collection of sources from temporary job sites and disposal or transfer to individuals specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State.

CONDITIONS

10. Licensed material may be stored at the licensee's facilities located at Lexington Blue-Grass Army depot, Lexington, Kentucky and at temporary storage sites of the licensee's within the United States.
11. Licensed material shall be used by, or under the supervision of, John Mattila, Jeffrey Havenner or Gavin Ziegler.
12. A. The Radiation Safety Officer for this license is Tim Mohs.  
B. The Alternate Radiation Safety Officer is Gavin Ziegler.
13. The licensee shall maintain records of information related to decommissioning at U.S. Army Armament, Munitions and Chemical Command, Rock Island, IL 61299 per the provisions of 10 CFR 40.36(f) until this license is terminated by the Commission.

Dear Sir:

There have been some changes in personnel in the U.S. Army Tank-automotive and Armaments Command, Armament and Chemical Acquisition and Logistics Activity (TACOM-ACALA) Safety Office due to retirements. Request that the following licenses be amended to reflect personnel currently working in the Safety Office:

12-00722-06 (H3, Pm 147 Fire Control Devices)  
License Manager: Mr. Jeff Havenner  
Radiation Safety Officer: Mr. Tim Mohs  
Alternate Radiation Safety Officers: Mr. Gavin Ziegler

12-00722-13 (Am 241 Chemical Agent Alarm)  
License Manager: Mr. Jeff Havenner  
Radiation Safety Officer: Mr. Tim Mohs  
Alternate Radiation Safety Officers: Mr. Gavin Ziegler

12-00722-14 (Ni 63 Chemical Agent Monitor)  
License Manager: Mr. Jeff Havenner  
Radiation Safety Officer: Mr. Tim Mohs  
Alternate Radiation Safety Officers: Mr. Gavin Ziegler

SUB 1340 (M7/M8 Uranium 238 Check Sources)  
License Manager: Mr. Jeff Havenner  
Radiation Safety Officer: Mr. Tim Mohs  
Alternate Radiation Safety Officers: Mr. Gavin Ziegler

XB001141 (Tritium Export License)  
License Manager: Mr. Jeff Havenner  
Radiation Safety Officer: Mr. Tim Mohs  
Alternate Radiation Safety Officers: Mr. Gavin Ziegler

Attached is the resume for Mr. Mohs.

FEE EXEMPT

JIMMY E. MORGAN  
Director, Armament and Chemical  
Acquisition and Logistics Activity

RESUME of TRAINING and EXPERIENCE  
Timothy J. Mohs

ACALA HEALTH PHYSICIST

EDUCATIONAL BACKGROUND:

Bachelor of Art, 1975: University of California, San Jose, CA.  
Molecular Biology, Minor in Chemistry

Master of Divinity, 1979: Trinity Evangelical Divinity School, Deerfield, IL.  
Masters of Divinity

RADIOLOGICAL TRAINING:

1965-66: Naval Nuclear Power School, one year intensive education in all aspects of nuclear reactor principles and operation preparatory to serving onboard Naval Nuclear Vessels. Vallejo, CA. and Idaho Falls, ID.

1966-71: Various Naval schools and informal training in radiation monitoring, exposure control, and work practices while serving onboard three Nuclear Submarine.

1971-79 Pursuit of formal education as listed above.

1979-82 Navsea 108 radiological training and practical application of fundamental radiological controls, Mare Island Naval Shipyard, Vallejo, CA.

1982 Qualified as a Radiological Control Technician at the Mare Island Naval Shipyard, Vallejo, CA.

1982-95 Informal training in monitoring and controlling radiological exposure during overhaul and repair of Naval Nuclear Submarines.

1993-94 Hazardous Material Management course, UC Davis, Davis CA. (174 hrs.).

1994 Hazardous Material Regulations course, SAIC (16 hrs).

1995-96 Radiological Protection and Tritium Devices (24 hrs.) and Radiological Material Handling (40 hrs.) Army ACALA sponsored courses.

## EXPERIENCE:

1964-71 Trained and served in Nuclear Submarines in a supervisory capacity. Worked with and operated monitoring equipment. Tracked and performed evaluations of radiological exposure and shielding requirements.

1971-79 Formal schooling as listed above.

1979-85 Interpreted and maintained sound radiological practices during submarine overhaul. Controlled personnel exposure to radiation and/or contamination during nuclear repair work. Interpreted and enforced technical requirements for radiological work practices. Operated and maintained radiological monitoring equipment. Performed and evaluated official surveys of radiation/contamination areas.

1985-90 Supervised radiological work and enforced sound radiological practices. Interpreted, and maintained technical radiological work instructions. Provided remote sight supervision and served as the radiological liaison between shops, codes, and the shipyard during complex, high risk radiological repair availabilities. Planned and implemented manhour requirements to successfully complete complex radiological work on nuclear submarines and surface craft.

1990-93 Wrote, reviewed, and approved technical documents emphasizing radiological aspects of work procedures. Interpreted government regulations and applied them to the work environment. Authored and implemented radiological control agreements between the shipyard and its customers. Provided interpretation and evaluation of radiation, contamination, shielding, and work practices to minimize personnel exposure during high risk work processes. Served as the Radiological Project Engineer for several high liability, off sight, projects.

1993-95 Provided radiological expertise for the handling and disposal of radioactive/hazardous waste. Performed curie content and isotopic analysis for radiological shipments. Wrote and implemented technical procedures for the safe processing, handling, storage, and disposal radioactive/hazardous materials. Interpreted and implemented government regulations for the safe transportation and burial of radioactive waste. Planned, directed, and set policy for work practices related to the disposal of radioactive waste at Mare Island Naval Shipyard. Resolved technical, scientific, environmental, and engineering problems related to handling and shipping radioactive waste.

1995-to present Provide expert input to NRC Licenses held by the Army. Issue and enforce government regulations regarding the use, repair, and disposal of radioactive commodities controlled by the NRC/ACALA licenses. Provide expert advice and remediation on incidents and/or situations as they arise during operations involving radioactive commodities used by the Army and Marines. Establish and schedule training for the users of commodities containing isotopes under the NRC/ACALA license. Conduct license inspections at sites holding commodities licensed through the ACALA Office.

JUN 03 1997

Jimmy C. Morgan  
Director, ACALA  
Department of the Army  
U.S. Army Armament and Chemical  
Acquisition and Logistics Activity  
AMSTA-AC-SF  
Rock Island, IL 61299-7630

Dear Mr. Morgan:

Enclosed are Amendment No. 32 to NRC Material License No. 12-00722-06, Amendment No. 28 to NRC License No. 12-00722-13, Amendment No. 26 to NRC License No. 12-00722-14, Amendment No. 14 to NRC License No. SUB-1340.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please be advised that NRC Region Offices do not issue licenses or amendments to export type licenses. In order to amend your NRC export License No. XB001141, you will need to contact Betty Wright, Office of International Programs at (301) 415-2342.

Please be advised that your license expires at the end of the day, in the month, and year stated in the license. Unless your license has been terminated, you must conduct your program involving byproduct materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Notify NRC, in writing, within 30 days:
  - a. When the Radiation Safety Officer permanently discontinues performance of duties under the license or has a name change; or

302666

- b. When the mailing address listed on the license changes. (No fee is required if the location of byproduct material remains the same.)
- 3. In accordance with 10 CFR 30.36(b) and/or license condition, notify NRC, promptly, in writing, and request termination of the license when a decision is made to terminate all activities involving materials authorized under the license.
- 4. Request and obtain a license amendment before you:
  - a. Change Radiation Safety Officers;
  - b. Order byproduct material in excess of the amount, or radionuclides, or form different than authorized on the license;
  - c. Add or change the areas of use or address or addresses of use identified in the license application or on the license; or
  - d. Change ownership of your organization.
- 5. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date of your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of byproduct material after your license expires is a violation of NRC regulations. A license will not normally be renewed, except on a case-by-case basis, in instances where licensed material has never been possessed or used.

In addition, please note that NRC Form 313 requires the applicant, by his/her signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when

J. Morgan

-3-

dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

SUBJECT

CNos 302646 ; 302647 ; 302648 ; and 302666

SUMMARY

1. Tim confirmed that Elizabeth Peterson has retired and should be removed from licenses as an authorized user as well as any RSO or alternate duties.
2. Tim confirmed that his work experience during overhaul and repair of Naval Nuclear submarines involved not only high levels of direct radiation but high levels of contamination involving many different radionuclides both beta and gamma. Also he has had experience with high levels of tritium contamination in his incident response activities since working for ACLA.
3. Tim confirmed that we could send all four amendments under one cover letter to Timmy C. Morgan, Dir. of ACTION REQUIRED ACLA.

SUBJECT: ACKNOWLEDGEMENT OF CORRESPONDENCE  
(Letter Dated 05/12/97)

Dear Licensee:

In response to your request, we have completed the initial processing, which is an administrative review of your application for a(n):

☐ New License                      ☒ Amendment                      ☐ Renewal  
☐ Termination                      ☐ Auth User (Amendment not required)  
☐ Other \_\_\_\_\_

No administrative deficiencies were identified during this initial review. However, it should be noted that a technical review may identify omissions in the submitted information.

It appears that your request is routine (see 1-3 below, as applicable).

1. New and amendment actions are normally processed within 90 days, unless we find major deficiencies, or policy issues requiring central program office assistance.
2. Renewal actions are normally processed within 180 days, however, under timely filing (before expiration), you may continue to operate under your existing license.
3. Termination actions are normally processed within 90 days, unless confirmatory surveys following decontamination/decommissioning activities are involved.

A copy of your correspondence has been forwarded to our Licensing Fee and Debt Collection Branch (301/415-6097) for approval of the fee category and amount, if required.

If you have a compelling safety or business-related reason for requesting expedited review, please contact the Materials Licensing Branch at (630) 829-9887. We will try to complete your request as soon as practicable. Any correspondence about this request should reference the control number.
