Establishment of Atomic Safety and Licensing Board

On July 16, 1973, the Commission published in the Federal Register, 38 F.R. 18921, a notice of hearing to consider the May 10, 1972, application for amendment of Source Material License No. SUB-1010 held by the licensee. The notice indicated that the Safety and Licensing Board for this proceeding would be designated at a later date, and that notice of its membership would be published in the Federal Register.

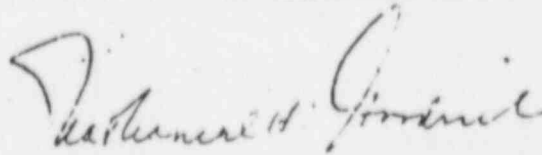

Pursuant to the Atomic Energy Act of 1954, as amended, the regulations of Title 10, Code of Federal Regulations, Part 2 (Rules of Practice) and the notice of hearing referred to above, notice is hereby given that the Safety and Licensing Board in this proceeding will consist of Dr. Dale F. Babcock, Mr. Lester Kornblith, Jr., and John B. Farmakides, Esq., Chairman.

The positions and mailing addresses of the Board members are as follows:

8512170277 730717  
PDR ADOCK 04008027  
C PDR

1. John B. Farmakides, Esq., Chairman, an attorney member of the Atomic Safety and Licensing Board Panel, U. S. Atomic Energy Commission, Washington, D. C. 20545.
2. Dr. Dale F. Babcock, 711 River Road, Wilmington, Delaware 19809.
3. Mr. Lester Kornblith, Jr., a technical member of the Atomic Safety and Licensing Board Panel, U. S. Atomic Energy Commission, Washington, D. C. 20545.

As provided in the notice of hearing, the date and place of a prehearing conference and of a hearing will be scheduled by the Board and will be published in the Federal Register.

Nathaniel H. Goodrich  
Chairman, Atomic Safety  
and Licensing Board Panel

Dated at: Washington, D. C.  
this 17th day of July 1973.

Dated at Bethesda, Md., this 28th day of June 1973.

For the Atomic Energy Commission.

WALTER R. BUTLER,  
Chief, Boiling Water Reactors,  
Branch 1, Directorate of Licensing.

# KERR-McGEE CORP.

## Notice of Hearing

The Kerr-McGee Corporation, Kerr-McGee Building, Oklahoma City, Oklahoma ("the licensee") is the holder of Source Material License No. SUB-1010 issued by the Atomic Energy Commission ("the Commission"). The license, issued on February 20, 1970, authorizes the use of source material in the production of uranium hexafluoride under certain conditions specified therein, and expires on February 28, 1975. On April 16, 1970, the licensee requested a license amendment which would permit, among other things, subsurface disposal of certain liquid radioactive wastes. By letter dated October 15, 1970, the Deputy Director for Fuels and Materials ("Deputy Director") advised the licensee that the requested amendment had been denied and specified the reasons therefor. During the thirty day period provided for in the letter within which the licensee could request a hearing, the licensee requested to be permitted to withdraw its application without prejudice. By letter dated March 18, 1971, the Deputy Director approved the licensee's request.

On May 10, 1972, the licensee again requested a license amendment which would authorize subsurface disposal of certain liquid radioactive wastes. The amendment requested would permit the licensee to utilize deep well disposal of radionuclide wastes generated from its solvent extraction uranium purification process at its Sequoyah facility. By letter dated September 29, 1972, the Deputy Director advised the licensee that its amendment request had been denied and specified the reasons therefor. After consideration of additional information submitted by the licensee, the Deputy Director, by letter dated March 14, 1973, affirmed the denial of September 29, 1972. On April 5, 1973, the licensee requested a hearing on the matter of the denial, pursuant to the provisions of 10 CFR 2.103.

The Deputy Director, pursuant to the Atomic Energy Act of 1954, as amended, and 10 CFR Part 40, denied the application of May 10, 1972 after determining that issuance of the license amendment would not conform with the requirements set forth in 10 CFR 40.32(c) and (d) because:

1. Existing information is not adequate to demonstrate the presence, location, or nature of the faults that are purported to provide barriers to movement of fluid from the disposal formation, nor is there adequate information to demonstrate that known faults will act as barriers to such movement during continued operation of the proposed well.

2. The complexity of the geologic formation is such that there is no assurance as to the migration paths of the radioactive wastes and the brines which would be displaced.

3. The complexity of the geologic and hydrologic system effectively precludes emergency recovery of the injected radioactive waste.

In view of the above determination with respect to matters of radiological health and safety, no findings were made by the Deputy Director with respect to whether, pursuant to 10 CFR 40.32(e), any applicable requirements in regard to environmental matters as set out in Appendix D of 10 CFR Part 50 had been satisfied.

Pursuant to the Atomic Energy Act of 1954, as amended, and the regulations in Title 10, Code of Federal Regulations, Part 2, rules of practice, notice is hereby given that a hearing will be held, at a time and place to be set in the future by an Atomic Safety and Licensing Board ("the Board") to consider the May 10, 1972 application for amendment of Source Material License No. SUB-1010 held by the licensee. The Board will be designated by the Chairman of the Atomic Safety and Licensing Board Panel. Notice as to its membership will be published in the Federal Register.

The Board will consider and initially decide, as the issues in this proceeding, whether, pursuant to the Atomic Energy Act of 1954, as amended, and in accordance with 10 CFR 40.32(c) and (d):

1. The licensee's equipment, facilities, and procedures proposed for use pursuant to the requested amendment are adequate to protect health and minimize danger to life or property; and

2. The issuance of the amendment will be inimical to the health and safety of the public.

If, upon consideration of the record developed in this proceeding, the Board makes an affirmative finding with respect to Item 1 and a negative finding with respect to Item 2, the application shall be remanded to the Deputy Director for such further action on environmental matters as may be required by 10 CFR 40.32(e).

A prehearing conference or conferences will be held by the Board, at a date and place to be set by it, to consider pertinent matters in accordance with the Commission's rules of practice. The date and place of the hearing will be set by the Board at or after the prehearing conference. Notices as to the dates and places of the prehearing conference and the hearing will be published in the Federal Register.

An answer to this notice, pursuant to the provisions of 10 CFR 2.705, must be filed by the licensee not later than August 6, 1973.

Papers required to be filed in this proceeding may be filed by mail or telegram addressed to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or may be filed by delivery to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C.

Pending further order of the Board, parties are required to file, pursuant to the provisions of 10 CFR 2.708, an original and twenty (20) conformed copies of each such paper with the Commission.

Pursuant to 10 CFR 2.783, the Commission authorizes an Atomic Safety and Licensing Appeal Board to exercise the authority and perform the review functions which would otherwise be exercised and performed by the Commission. The Appeal Board will be designated pursuant to 10 CFR 2.787, and notice as to its membership will be published in the Federal Register.

Dated at Germantown, Maryland this 10th day of July 1973.

For the Atomic Energy Commission.

GORDON M. GRANT,  
Acting Secretary of  
the Commission.

## ENVIRONMENTAL PROTECTION AGENCY

### EFFLUENT STANDARDS AND WATER QUALITY INFORMATION ADVISORY COMMITTEE

#### Notice and Agenda of Meeting

1. *Notice of meeting.* Notice is hereby given that meetings of the Effluent Standards and Water Quality Information Advisory Committee ("the Committee") established under section 515 of the Federal Water Pollution Control Act ("the Act") 33 U.S.C. 1373; Public Law 92-500, will be held beginning at 9 a.m. on each day, July 23, 1973, through July 27, 1973, in Room 1112, Crystal City, Building 2, Arlington, Virginia. These are regularly scheduled meetings of the Committee.

During the week of July 23, 1973 through July 27, 1973, the Committee intends to consider scientific and technical information pertinent to the determination required to be made by the Administrator of the Environmental Protection Agency when proposing regulations providing effluent limitations guidelines and standards of performance for new sources under the Act, including guidelines and standards for the following categories of sources: pulp and paper mills; paperboard, builders paper and board mills; meat product and rendering processing; dairy product processing; grain mills; canned and preserved fruits and vegetables processing; canned and preserved seafood processing; sugar processing; textile mills; inorganic chemicals manufacturing; soap and detergent manufacturing; fertilizer manufacturing; petroleum refining; nonferrous metals manufacturing; phosphorus manufacturing; steam electric powerplants; ferroalloy manufacturing; leather tanning and finishing; glass and asbestos manufacturing; and rubber processing.

The meetings will be open to the public. The Committee does not intend to receive oral statements or hold informal workshops. However, written statements may be submitted to the Committee in
