Glen Ellyn, IL 60137

Reference License No. 48-18812-01

Dear Sir:

It is our intention to purchase a number of 100 millicurie sealed source heads for use in monitoring the level of flyash in the precipitator hoppers at this site. We are therefore requesting an amendment to our current license to include these devices, as specified below:

| | |
|------------------------------|--|
| * * * * * | * * * * * |
| Cs - 137 Sealed Sources | For possession and use in Texas Nuclear devices which have been evaluated and approved for licensing purposes and authorized for distribution under a license issued by the Nuclear Regulatory Commission or an Agreement State. |

All other conditions of licensure will remain the same.

* * * * *

The existing license restricted our use to sources 50 millicuries or less which are inadequate for the intended application.

Please contact me if you have any questions or require any additional information regarding this amendment. I can be reached at 715 359-3351 or at the above address if necessary.

Sincerely,

Richard E. Steiner
Richard E. Steiner
