Licensing and Regulation

Gentlemen:

Enclosed is AEC Source Material License No. SUB-1010, as amended in its entirety.

Please note that the license does not authorize the disposal of liquid wastes containing radioactive constituents by injection into a disposal well. As indicated in our letter of February 11, 1970, additional information is required in order to further consider your request to dispose of liquid wastes by well injection.

Also enclosed herewith is Dr. Pittman's letter, including enclosures, of January 23, 1970, which is being returned at your request in accordance with our discussions on February 13, 1970. During our discussions, you advised that the letter and enclosures should not be considered as part of your license application.

Please let me know if you have any questions concerning the enclosed license or conditions thereof.

Sincerely,

Original signed by
Don F. Harmon
