

OCT 3 1972

Docket No. 50-231

General Electric Company
ATTN: Dr. Bertram Wolfe
General Manager
Breeder Reactor Development Operation
310 DeGuigne Drive
Sunnyvale, California 94086

Gentlemen:

Change No. 14
License No. DR-15

By letter dated September 14, 1972, you proposed changes to the Technical Specifications of Facility License No. DR-15. The changes would permit a reduction in the surveillance requirements at the SEFOR facility.

During our review, we found that certain modifications to the proposed changes were necessary to meet regulatory requirements. These modifications were discussed with your staff. Based on our review of the proposed changes, as modified, we have concluded that implementation of the changes will not present significant hazards considerations not described or implicit in the Safety Analysis Report and that there is reasonable assurance that the health and safety of the public will not be endangered.

Accordingly, pursuant to Section 50.59 of 10 CFR Part 50, the Technical Specifications of Facility License No. DR-15 are hereby changed as follows:

- (1) Delete Sections 4.1, 4.3 and 4.4.
- (2) Change Specifications 4.6 in its entirety to read:

"Soil, water and vegetation samples will be taken quarterly from at least three of the locations specified in References

A/77

(1) and (2). The locations selected each quarter from the eleven locations identified will be such that all eleven locations are covered at least once annually."

Sincerely,

151

Donald J. Skovholt
Assistant Director
for Operating Reactors
Directorate of Licensing
