Mr. John R. Madera
Material Licensing Section, Region III
U.S. Nuclear Regulatory Commission
799 Roosevelt Road
Glen Ellyn, Illinois 60137

REFERENCE: Crane Midwest Fittings Temporary Material
License No. 24-00563-02, Amendment No. 22

SUBJECT: Request for 90 day extension of our Temporary License

Dear Mr. Madera:

Per our phone conversation on 08-12-85 attached find NRC Form 313, Application For Material License Renewal and check for \$530.00.

Upon your review of this application you will find that Crane's Operating and Emergency Procedures are not attached. We are requesting an additional 90 day extension to our temporary license for submittal of this document because construction of our new enclosure for Isotope Radiography operations is not complete.

To help in your review of this request for extension, I have attached two photographs of our Gamma-ray booth showing construction progress to date and the proposed sketches showing the dimensions and location of our new facilities.

This 90 day extension should give us sufficient time to complete the remaining construction which will be construction of the movable covers for the opening in the booth roof. In addition, the recording of radiation levels, determining locations of visual-audible Gamma alarms, etc. on the sketches will be completed. Also find attached our proposed procedure for requalifying personnel with previous radiographic training.

CONTROL NO. 7 9 5 8 7

When our facilities are completed we will forward our Operating and
Emergency Procedures for your review and comments.

Very truly yours,

CRANE MIDWEST FITTINGS
