

MAR 07 1986

Miami Valley Hospital
Department of Nuclear Medicine
ATTN: Dr. Jose D. Quinones
Director, Nuclear Medicine
1 Wyoming Street
Dayton, OH 45409

Gentlemen:

It has come to our attention that Amendment No. 65 of NRC License Number 34-00341-06 issued on June 21, 1985 contained several errors. Subitem 8.M. contained an incorrect possession limit and Dr. Quinones was authorized for Cesium-137 in Condition 12. instead of Cesium-137 in Subitem 6.J. Based upon the March 5, 1986 telephone conversation between Dr. Adam of our staff and Dr. Quinones, we understand that the animals used in the study described in your May 20, 1985 letter are currently allowed to decay to background radiation levels in accordance with Condition 16. of your license prior to incineration. If our understanding is incorrect please notify this office.

Enclosed is a corrected copy rectifying these errors. We are sorry for any inconvenience this error may have caused you.

Sincerely,

Original Signed By
William J. Adam, Ph.D.
Materials Licensing Section

Enclosure: Corrected copy of
Amendment No. 65
