Subject: CNWRA Program Manager's Periodic Report on Activities of the
Center for Nuclear Waste Regulatory Analyses for Period 9-FY97

Dear Mr. Linehan:

The attached "Program Manager's Periodic Report" (PMPR) documents the progress and financial status of the Center for Nuclear Waste Regulatory Analyses (CNWRA) for the period May 10 through June 6, 1997. Its contents comply with the requirements of section F.1.5. of the referenced contract. A diskette containing the PMPR in WordPerfect 5.1 format is also enclosed.

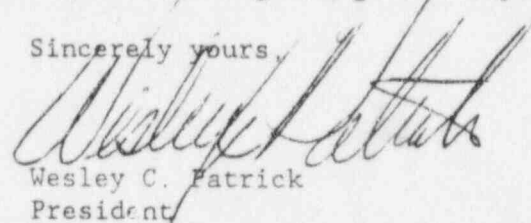

Cost variance analyses are provided for the Division of Waste Management (D1035), Waste Solidification Systems (WSS) (L1793), and Tank Waste Remediation System (J5164) Job Codes (JCs), as well as for composite spending on this contract. Note that all variances are expressed with regard to the current operations and project plans.

Schedule changes are included in table 2 of the PMPR. Five deliverables were transmitted during period 9.

Per discussions with cognizant NRC staff, the CNWRA will submit the necessary change pages to the WSS Operations Plan to reflect termination of the existing WSS JC and initiation of another JC. The NRC contracting officer will convey a modification to the current NRC contract to obligate and authorize funding for the new JC and provide the guidance on presentation of such change pages.

Please contact me or Mr. Henry Garcia if you have questions regarding this report.

Sincerely yours,

Wesley C. Patrick
President
