 5. Letter from NRC to Westinghouse, "Requests for Additional Information (RAIs) on AP600 Shutdown Emergency Response Guidelines (ERGs)," dated June 3, 1997.

Dear Mr. Quay:

Reference 1 provided the AP600 Emergency Response Guidelines (ERG) for NRC review. By References 2, 3, and 4, the NRC provided review comments for which resolution paths were subsequently reached. Those resolutions form the basis for Revision 3 of the ERGs, enclosed for NRC review.

This completes Westinghouse action to provide Revision 3 of the ERGs such that the Westinghouse status for Open Item Tracking System (OITS) item 5518 is now "Closed". The NRC should review the enclosed ERG and Background Information changes and provide Westinghouse with NRC status information; Westinghouse believes this status should be "Resolved".

The RAIs provided in Reference 5 have been added to the OITS as item 5519 and work is progressing to provide responses to these RAIs, 440.648 through 440.658.

Recipients of the enclosure to this letter should replace changed pages throughout their ERG binders as noted in the attached List of Affected Pages. Note that although most ERG pages remain Revision 2, the Document is Revision 3. If you have any questions regarding this submittal or the AP600 ERGs, please contact Robin K. Nydes at 412-374-4125.
