ATTENTION: Dr. Piccone

REFERENCE: Nuclear License Application
Mail Control #104728

Dr. Piccone:

Per our telephone conversation of 1/21/86, the following is a confirmation of the intended use and transportation of equipment described on the initial application.

1. The unit is to be on our premises only on a temporary basis. We are a sales office and our purpose is to sell this product to prospective customers. Therefore, this unit will be shipped to us from the factory in Marshalltown, Iowa upon request. During the time we have the equipment here, it will be taken to numerous customers for demonstration purposes only to determine if the customer can successfully use it in his operation. When these demonstrations are done, the unit will be shipped back to the factory.
2. When the unit is in our possession, it will be kept in the secured container as received from the factory. When taking this to and from the customers facility to demonstrate, we will keep it locked in the trunk of the salesman's automobile.

I trust this will satisfactorily answer your questions. Should you have any questions or require any additional information, please let us know.

Very truly yours,

Bob Redilla
