Attn: Document Control Desk
Washington, D.C. 20555

In Reply Refer To: NRC License No.22-01859-01
Docket # 030-02205

Dear Sir:

This is the reply to a Notice of Violation, Condition No. 12.C. of License No. 22-01859-01.

It has been the practice of this facility to allow the Radiation Safety Officer to approve requests from preapproved individuals to use additional licensed materials. As of the date of this letter, the Radiation Safety Committee will approve such requests.

In order to accommodate our researchers, a proposal to allow the Radiation Safety Officer to grant temporary approval of these requests will be brought before the committee when it convenes this month (6/97). The proposal will stipulate that the Radiation Safety Officer bring all such requests before the committee at their next scheduled meeting for review and approval.

These corrective actions should bring our facility into compliance. If you have any questions please contact us.

Sincerely,

[Handwritten signature]
Charles A. Milbrandt, FACHE
