Docket File #40-8027 ✓
RO:HQ (2)

Gentlemen:

This will confirm our telephone conversation of July 26 when we indicated that while you need not respond to the Corps of Engineers comments sent to you with our letter of July 23, your response to the Department of Housing and Urban Development comments covering the following material is requested:

- a. Describe your current plans for plant expansion along with your assessment of the environmental impact of the proposed expansion.
- b. Identify and discuss current plans by both private and public agencies for development of the area surrounding the plant site with particular emphasis on proposed recreational facilities.
- c. Provide your assessment, substantiated by facts or expert opinion, of the impact of the plant installation and operation on the current and future socio-economic structure of the overall area surrounding the plant.

As pointed out in our conversation, HUD desires that the FES contain additional information on the impact of the Sequoyah facility on the health, welfare and well-being of the surrounding population.

It is requested that your response to these comments be prepared in time to reach this office by August 23, 1974.

Sincerely,

8512180436 740726
