Kerr-McGee Nuclear Corporation  
 ATTN: Mr. W. J. Shelley, Director  
 Regulation and Control  
 Kerr-McGee Building  
 Oklahoma City, Oklahoma 73102

Gentlemen:

You will find enclosed copies of comments received to date from Federal and State agencies who were requested to review the draft environmental statement for the Kerr-McGee Sequoyah Uranium Hexafluoride Plant. It is requested that your staff prepare an appropriate reply to each of the comments requiring a response, in sufficient detail to permit direct inclusion in the final environmental statement. The comments to which your staff should respond have been so noted in the margins of the enclosed letters.

The schedule for completion of the final environmental statement provides 28 days for preparation of your response to public and agency comments. In order that we may meet the scheduled completion date, your response to these comments must be in this office by July 15, 1974. It should be pointed out that additional comments requiring responses in the FES are expected from several other agencies, namely the U. S. Department of the Interior and the U. S. Environment Protection Agency. These late comments will be forwarded to you as soon as practicable after receipt and your required response date will be adjusted accordingly.

Sincerely,

J. E. Rothfleisch
