May 9, 1997

Harold B. Ray, Executive Vice President
Southern California Edison Co.
San Onofre Nuclear Generating Station
P.O. Box 128
San Clemente, California 92674-0128

SUBJECT: NRC INSPECTION REPORT 50-361/97-07; 50-362/97-07

Dear Mr. Ray:

An NRC inspection was conducted April 7-11, 1997, at your San Onofre Nuclear Generating Station, Units 2 and 3, facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report. The enclosed report presents the scope and results of that inspection.

During the inspection, it was determined that your physical security program was effectively implemented. It is our understanding that during the exit meeting on April 11, 1997, Mr. M. Speer stated that a security officer would be posted during peak traffic flow periods in order to assure positive access control at the entrance turnstiles. Further, the requirement to post the security officer would be made a part of the appropriate security procedure. Please confirm within 30 days of the date of this letter that our understanding of this regulatory commitment is correct.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material will not be placed in the Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Arthur T. Howell III, Director
Division of Reactor Safety
