**Implementation of EMF-1125(P) and (NP), Supplement 1, Appendix C**

Ref.: 1. EMF-1125(P) and (NP), Supplement 1, Appendix C, "ANFB Critical Power Correlation Application for Co-Resident Fuel," Siemens Power Corporation, November 1995.

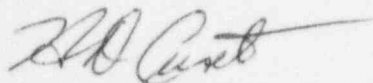

Ref.: 2. Letter, J. E. Lyons (USNRC) to R. A. Copeland (SPC), "Acceptance for Referencing of Licensing Topical Report EMF-1125(P), Supplement 1, Appendix C, "ANFB Critical Power Correlation Application for Co-Resident Fuel," May 9, 1997.

Attached is our implementation plan for the Reference 1 topical report. Reference 2 provides the NRC Safety Evaluation Report. Siemens Power Corporation is preparing an "(A)" version of this report as requested in the SER transmittal letter.

As noted in the recent NRC inspection, Siemens Power Corporation requires a clear understanding of the report and SER requirements. This implementation plan explicitly reflects our understanding of the SER requirements and the topical report requirements.

Please acknowledge your agreement with the implementation plan in a letter to SPC for inclusion in the (A) version of the published topical report. If you have any questions, please contact me at (509) 375-8563.

Very truly yours,

H. Donald Curet, Manager  
Product Licensing
