

JAN 28 1986

Northrup King Company
ATTN: Tim C. Murphy, Ph.D.
Stanton, MN 55081

Gentlemen:

Enclosed is Amendment Number 01 to your NRC License Number 22-23522-01 which authorizes the changes you requested in your letter dated December 12, 1985.

Please note that we have not granted you the authority for in-house approval of authorized users. This privilege is given to large broad scope licensees who have extensive experience in radiation safety programs and who have a radiation safety committee who reviews each user in accordance with NRC approved criteria. The size of your program does not appear to warrant this type of licensing. In addition, please note the wording of License Condition 12., which states licensed material may be used by named individuals or under their supervision. Because of the phrase "under the supervision of," it is not necessary nor advisable to list the name of each technologist who works with the material. The approval and training of a technologist is the responsibility of the radiation safety officer and need not be reviewed by the NRC. In this regard, we have not added Diana Beckman to the license at this time. If you want her added to the license as a user capable of supervising others, you must submit additional information concerning her training in principals and practices of radiation protection, radioactivity measurements, monitoring techniques, mathematics and calculations basic to radiation and the biological effects of radiation.

If you have any questions or require clarification on any of the information stated above, you may contact us at (312) 790-5625.

Sincerely,

Original Signed By
Evelyn R. Matson
