NOTE TO FILE

University of Michigan 21-00215-04

I asked T. Burdick, Region III (non-power reactor inspector), who would be preparing response to 6/10/97 letter we received from the Ford Nuclear Reactor/Phoenix Memorial Lab regarding the activation project they will be performing under contract from ORNL (part of ORNL research on embrittlement testing). Tom indicated that he contacted Ted Michaels, the Project Manager in HQ and HQ will prepare the response. He also indicated that Texas A&M has a similar request in at HQ and they'll be responding to their inquiry first.

Place copy of letter in license file as info. Response from HQ will most likely be filed with the Ford reactor license (R-28).
