Glen Ellyn, IL 60137

Dear Sir:

Enclosed is our Application for Material License renewal form. The only changes that have been made since the original application was submitted are in personnel. Our contact person is now Mr. Sujan C. Gulati, Technical Superintendent, and in 1983, we had filed to change our Chief Radiation Officer to Mr. Kenneth Harris.

Only those pages of the original application that reflected former employees have been revised. Revised copies are attached. The original application was made with form 313I and the updated pages will reflect this.

I will note that our use is for non-portable gauging devices, and, thus, would fall under any new guidelines as described in your Draft Value/Impact Statement.

Yours truly,

Harold E. Koehn
