Charles J Haughney
Deputy Director
Spent Fuel Project Office
Nuclear Regulatory Commission
Washington, DC 20555-0001
USA

Dear Mr Haughney,

Thank you for your letter of 16 May and enclosures.

My reason for writing again is to ask whether you could send copies of the reviews/endorsements of the NUREG-0360 criteria by the NAS and NRC ACRS, as mentioned on p232 of your 1995 RAMTRAMS article.

As you will be aware, the UK Government has announced a review of issues associated with the air transport of plutonium. There is therefore some urgency to my request, as I would like to utilise the peer reviews in a submission to the UK Government review.

I look forward to your earliest possible response.

Yours sincerely,

Fred Barker
