Secretary of the Commission

Attention: Docketing and Service Branch

Gentlemen:

We have reviewed Regulatory Guide 1.142, Safety-Related Concrete Structures for Nuclear Power Plants (other than Reactor Vessels and Containments), and we have the following comment:

Paragraph C.8 should be revised to allow the testing of embedded piping in accordance with the requirements of the code that governs that piping, e.g., ASME Boiler and Pressure Vessel Code, ANSI 31.1, state or local plumbing codes, etc.

Sincerely,

V. S. Boyer
