U.S. NUCLEAR REG.  
NMSS MAIL SECTION

SNM License 1067  
Docket No. 70-1100

U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Attention: Mr. Charles E. MacDonald, Chief  
Transportation Branch  
Division of Fuel Cycle & Material Safety

Gentlemen:

It is requested that USNRC Certificate of Compliance No. 6078 be revised to allow securing of the upper bundle bracket to the strongback of the Model No. 927A1 shipping container by either of the two methods now approved for the Model No. 927C1 shipping container under Paragraph 7 of the present certificate. The 927A1 container is structurally identical to the 927C1 container with the exception of its reduced length. Therefore, the requested amendment falls in the category of an administrative change.

Accordingly, it is requested that Paragraph 7 of USNRC Certificate of Compliance No. 6078 be amended to read in part as follows: "7. For the Model No. 927A1 or the Model No. 927C1, the upper bundle bracket may be secured . .". All other parts of Certificate of Compliance No. 6078 should remain unchanged.

Very truly yours,

H. V. Lichtenberger  
Vice President-Nuclear Fuel  
Nuclear Power Systems-Manufacturing
