Subject: Amendment of NRC Export License XSNM - 1009 for Pu  
238 in sealed sources, contained in Cardiac Pacers

Dear Mrs. Wright:

This letter requests issuance of Amendment #1 to our  
export license XSNM - 1009 (copy attached) to extend its expiration  
to January 1, 1981. Our present license expires on January 1, 1979.

Since December 8, 1976, when this license was originally issued,  
we have not exported any nuclear-powered pacers to those countries  
authorized in our license. We do not expect to exceed our 45.0  
gram export quantity restriction within the license extension  
period, and do not request an increase in this authorization.

Cordis Corporation is properly licensed by the State of Florida to  
manufacture and domestically distribute nuclear pacers under license  
#464-3 Amendment #7, which is valid through October 31, 1980.

We trust the above is sufficient background to support this amendment  
request. However, should you have any questions concerning this matter  
please call me as indicated below.

Very truly yours

*Joseph J. Schwoebel*
