License No. 13-02752-03

Based on the investigation conducted on September 12-14, 1978, it appears that certain of your activities were in noncompliance with NRC requirements, as noted below. Items 1 and 2 are infractions, and item 3 is a deficiency.

1. License Condition 8 authorized the possession of a maximum of 200 millicuries of strontium 90 in any form.

Contrary to the above, at the time of the investigation two 1 curie strontium 90 sealed sources were in your possession.

2. License Condition 24C requires that each sealed source be tested for leakage and/or contamination at intervals not to exceed six months.

Contrary to the above, leak tests of four sealed sources were not performed every six months during the period May 1973 to May 1978.

3. 10 CFR 30.51(a) requires that records be kept showing the receipt of materials.

Contrary to the above, no record was kept of the four sealed sources received in May 1973.
