Gentlemen:

Subject: NRC Inspection

This refers to the inspection conducted by Ms. B. Riedlinger and Mr. R. Thomas of this office on October 25, 1978, of activities authorized by NRC License No. 04-17679-01E and to the discussion of our findings held by Ms. Riedlinger with Mr. Zanger and Mr. Lieberman of your staff at the conclusion of the inspection.

This also refers to the meeting held on November 1, 1978, as documented in a letter to you which was issued on the same date.

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel and observations by the inspectors.

During this inspection, it was found that certain of your activities appeared to be in noncompliance with NRC requirements. The items and references to the pertinent requirements are listed in the enclosure to this letter. These items have been categorized into levels as described in our correspondence to all NRC licensees dated December 31, 1974. A copy of that letter is enclosed for your convenience.
