Anchorage, Alaska 99516

SUBJECT: LICENSE TERMINATION

Enclosed is Amendment 1 to License 50-23296-01, terminating the license. The license is no longer valid and should not be used for any purpose.

We understand that you still possess a portable gauge containing radium-226. As the U. S. Nuclear Regulatory Commission has no jurisdiction over that material, its possession and use does not require a license from this agency.

This termination amendment does not relieve you of any responsibility to pay outstanding fees owed to the federal government.

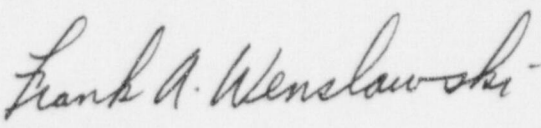

This action was issued in accordance with the Order Suspending License dated November 15, 1995. The order specified, in part, that, "The License shall be terminated upon satisfaction of the requirements of 10 CFR 30.36." 10 CFR 30.36(j) specifies that the disposition of all licensed material will be certified, and that a completed NRC Form 314 should be submitted or equivalent information obtained.

Lacking your willingness to supply a completed NRC Form 314, we obtained the equivalent information. The last inspection of your license was conducted on July 28, and August 2, 1995. The Inspection Report, No. 95-01, indicated that you possessed two licensed gauges, Troxler Model 3411-B, serial numbers 5485 and 10537. This was also confirmed in a letter from you dated March 6, 1996. In that letter you indicated that the gauges had been transferred to Mark Hansen, P.E., License 50-23283-02. Although Mr. Hansen agreed to accept the gauges, they were not immediately transferred to his possession. On March 5, 1997, we were able to verify that the two Troxler 3411-B gauges had been received by Mark Hansen. The gauge with serial number 5485 was received on July 22, 1996, and was leak tested that day. The gauge with serial number 10537 was received on December 3, 1996, and was also leak tested on receipt. The leak test analyses were performed by Troxler on July 30, 1996, and December 18, 1996, respectively. They indicated no removable contamination in excess of 0.005 microcuries. Thus, the sources retained their integrity, and close-out surveys of former storage areas are not required.

Our records also indicate that at one time you possessed three Troxler 3411B gauges which were transferred to you from Frederick Schwaderer (License 50-29017-01, this license was subsequently terminated). These gauges had serial numbers 9235, 9828, and 10534. These were transferred to Mark Hansen (License 50-23283-02) in November 1993. Leak test analyses conducted on these sources after their transfer to Mark Hansen indicated that the sources retained their integrity and that close-out surveys are not required due to their possession.

If you have questions concerning these matters, contact Beth Prange at (510) 975-0250.

Sincerely,

fr Ross A. Scarano, Director
Division of Nuclear Materials Safety

Attn: Beth Prange
Re: Gage transfer

Dear Ms. Prange:

We have transferred two Troxler 3411 B Gages to Mark Hanson P.E.
as of this date.

The serial numbers are as follows:
Gage #1 15485 Gage #2 10537

These are the only two gages we had that required an NRC license.

Gage #1 is stored in Dillingham, and gage #2 is stored in King
Salmon.

Leak testing will be performed before shipping.

If you have any questions or require additional information,
please feel free to call us at 344-4108, or fax us at 349-8791.

Sincerely,
Sandor Manyoky

SUBJECT -

License Termination (Jim Montgomery participated in this call)

SUMMARY -

Sandor Manyok stated that if he had to pay outstanding fees, he did not wish to terminate his license. He stated that he has no licensed material now. He said that he felt he had two options: 1.) agree to abide by the regulations and keep the license

OR

2.) Don't accept military contracts.
(because the Air Force requires it)

He stated that his NRC license was needed to do work on military bases such as Elmendorf AFB even if he was using a radium gauge. He generally works for a contractor with a primary government contract (ie. He is a sub-contractor).

License Termination (Jim Montgomery participated in this call)

SUMMARY -

Sandor Manyoky stated that if he had to pay outstanding fees, he did not wish to terminate his license. He stated that he has no licensed material now. He said that he felt he had two options: 1) agree to abide by the regulations and keep the license

OR

2) Don't accept military contracts.
(because the Air Force requires it)

He stated that his NRC license was needed to do work on military bases such as Elmendorf AFB even if he was using a radium gauge. He generally works for a contractor with a primary government contract (ie. He is a sub-contractor).

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION IV
611 RYAN PLAZA DRIVE, SUITE 400
ARLINGTON, TEXAS 76011-8064

November 15, 1996

Mr. Sandor Manyoky
Vice President
Haas & Associates
3900 East 112th Avenue
Anchorage, Alaska 99516

SUBJECT: ORDER SUSPENDING LICENSE

This letter is in reference to the Order Suspending License issued on November 15, 1995. Under the terms of the Order, License 50-23296-01 is suspended, and you may no longer use licensed material. You must restrict activity to safe and secure storage or transfer, and you must continue to control entry into restricted areas until NRC has confirmed that they are suitable for unrestricted use. You must also properly dispose of the licensed material which was procured under License 50-23296-01. Upon receipt of information regarding the proper disposition of all licensed material, the license will be terminated.

These matters were discussed with you in a telephone conversation on January 17, 1996, and again on March 6, 1996. In a letter dated March 6, 1996, you indicated that you had transferred the two gauges remaining under your license to Mark Hansen, P.E., License 50-23283-02. Discussions with Mr. Hansen have indicated that the gauge, which was located in Dillingham, Alaska, has been transferred to his license. Further, leak tests performed subsequent to the transfer demonstrate that the source has maintained its integrity. Mr. Hansen has stated that your other gauge has not been transferred to him and remains at your facility in King Salmon, Alaska.

Since March 1996, efforts to contact you by telephone or in person have been unsuccessful. Therefore, to demonstrate responsiveness to the Order, you must immediately submit the following information to us:

1. A statement that the gauge which remains in King Salmon, Alaska, is in secure storage and is not being used to measure properties of materials.
2. A timeline for final transfer of the remaining gauge from your facilities in King Salmon to Mark Hansen, P.E.
3. A statement that no other licensed materials have been procured.

Upon transfer of all materials from your possession, you must also complete and submit the enclosed NRC Form 314, "Certificate of Disposition of Materials." Your reply to the information requested above and your submittal of the NRC Form 314 should be sent to the address shown above, Attention: Nuclear Materials Licensing Branch.

November 15, 1996

If you have questions concerning these matters, contact Frank Wenslawski at (510) 975-0219.

Sincerely,

A handwritten signature in cursive script, appearing to read "Ross A. Scarano".

Ross A. Scarano, Director
Division of Nuclear Materials Safety

SUBJECT -

Haas gauge

SUMMARY -

They have not received the gauge from King Salmon.

They have tried several times to get Sandoz to return the gauge. They are frustrated and have considered sending one of their personnel to pick it up, but the ^(and travel expense great) site is remote. Right now is their busiest season, so disrupting schedules now would involve even more problems + expense. Sandoz Manyok is in King Salmon now, but Mrs. Hansen does not have a phone number for him.

Attn: Beth Prange
Re: Gage transfer

Dear Ms. Prange:

We have transferred two Troxler 3411 B Gages to Mark Hanson P.E. as of this date.

The serial numbers are as follows:
Gage #1 15485 Gage #2 10537

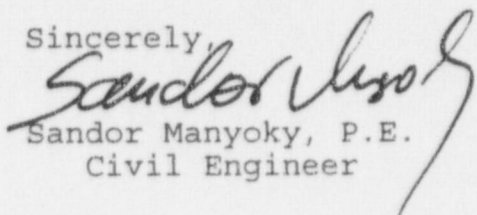

These are the only two gages we had that required an NRC license.

Gage #1 is stored in Dillingham, and gage #2 is stored in King Salmon.

Leak testing will be performed before shipping.

If you have any questions or require additional information, please feel free to call us at 344-4108, or fax us at 349-8791.

Sincerely,

Sandor Manyoky, P.E.

Subject: Transfer of Troxler Moisture Density Gauges

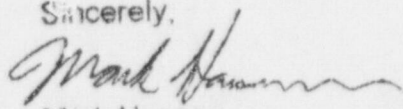

Gentlemen:

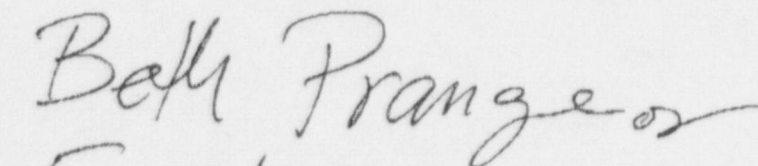

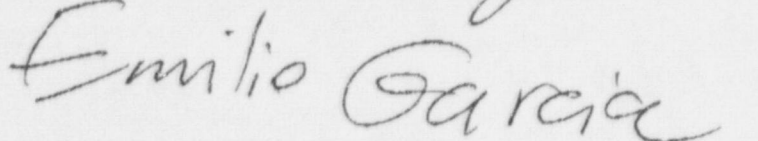

While reviewing our records, we find that we do not have a record of transfer for the nuclear gauges we received from you about November 30, 1993. Prior to this time, Mark Hansen was an authorized user under your license. By this letter, we acknowledge receipt of the following gauges:

Model	Gauge Serial
Troxler 3411 b	9235
Troxler 3411 b	9828
Troxler 3411 b	10534

Also attached is a copy of our NRC license, which you will need for your records.

Sincerely,

Mark Hansen

License renewal / inspection

SUMMARY -

Mr. Manyokky stated that he did not want a storage-only license - he does wish to renew. He said that he was having trouble with the requirement to have a survey instrument. I suggested that he contact Trofles or local companies to see if he could make arrangements to borrow a meter in an emergency situation.

Mr. Manyokky stated that he has 3 gauges -

2 are 3411 B's

1 is a 2401 (Ra/Be - not licensed).

They are currently stored at King Salmon, AK., although he does not know the current address of the trailer. He promised to send a map of the storage location tomorrow. He believes the street it is on is Coho Loop Road.

SUBJECT -

SUMMARY -

The military base at King Salmon was closed, so there is no work there at present. Mr. Manyoky plans to be ^(doing survey work) working in Dillingham, Alaska for the next 4-6 weeks.

He stated that the 3900 E. 112th Ave., Anchorage, AK. address was a suitable year-round mailing address.

We explained that a written reply to the deficiency letter of Aug. 19, 1994 was still needed, ~~also~~ along with answers to new concerns addressed in the licensing guide, as were explained by Kent Prongerast.

Emilio announced an inspection for July 28th. Mr. Manyoky stated that he would try to be there.

CONVERSATION

SUBJECT: License Amendment

SUMMARY: I spoke with Sandor Manyoke regarding his request for storage only. I wanted to explain the time limitations and conditions for storage and let him know that prior to any use that he must request for and submit an application for renewal. He asked how he would get permission to use the gauges. I told him that he would have to submit a new application. I explained that there was a new standard review plan for portable gauges. He stated that he was not sure what he wanted to do at the present. That he might want to sell his gauges but did not want to do anything until he has seen the new SRP. He requested I hold up issuing the license for storage only until he had seen the SRP. Then he would make up his mind.

Anchorage, Alaska 99516

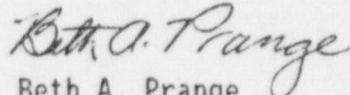

SUBJECT: LICENSE RENEWAL

This is in reference to your letter dated June 23, 1994 requesting renewal of your byproduct material license. A review of your license file indicates that there have been changes to your program which are not reflected in your license. For this reason, you should resubmit a complete renewal application. In your reply, you should address the following issues:

1. Please specify the appropriate mailing address. If a different address is needed during certain times of the year in order for information and correspondence to reach you, please specify that as well.
2. You should indicate the maximum number of Troxler Model 3400 gauges, 4640 gauges, 3216 gauges, and 3241 gauges which you may wish to possess at any one time. This information is needed so that the correct possession limits are indicated for each model.
3. You should provide a sketch of the gauge storage area(s) currently in use. Specify their locations (street addresses), and describe key control procedures.
4. A standard license condition indicates that physical inventories will be conducted every six months. However, a review of the file indicated that your gauges are typically in storage between November and April of the following year. If this is the case, you should specify when you will conduct inventories. For example, a procedure indicating that you will inventory the gauges prior to their first use in May and after the last use in October seems to be more appropriate to your situation. You should submit the procedures you will use for inventories. You should also commit to maintaining records of the inventories and indicating the dates when the gauges are put into and removed from storage.

We will continue the review of your renewal request upon receipt of this information. In order to continue prompt review of your application, we request that you submit your response to this letter within 30 days from the date of this letter. Please reply in duplicate, and refer to Mail Control No. 572007.

Sincerely,

Beth A. Prange

SUBJECT: LICENSE RENEWAL

This is in reference to your letter dated June 23, 1994 requesting renewal of your byproduct material license; to our letter dated August 19, 1994 describing information needed to renew the license; and to subsequent letters from you dated February 7 and 14, 1995, indicating that you wished to convert your license to storage-only. This also refers to telephone conversations with Mr. Kent Prendergast of this office on March 13, 21, 24, 1995, April 3, 1995, and May 10, 1995. In these telephone conversations, you indicated that you would like to resume use of licensed materials, that you would answer the questions in our letter dated June 23, 1994, and that you would submit a new application in the format described in the new portable gauge licensing guide by March 24, 1995.

As we have no written response from you subsequent to your letter of February 14, 1995, we have to assume that it would be acceptable for us to issue a storage-only license. Unless we receive a written response from you by July 9, 1995, we will renew your license with a storage-only provision. Should you decide to use your gauges subsequent to that time, you will need to submit a license amendment request and pay the appropriate fee.

If you wish to renew your present program, you should submit a completed renewal application, addressing the items described in our letter to you dated August 19, 1994, and as detailed in the new portable gauge licensing guide (copies enclosed). Please reply in duplicate, and refer to Mail Control No. 572007.

Sincerely,

Beth A. Prange

Re: NRC license renewal

via Fax (510) 975 0381

Dear Ken

As per our phone conversation today in regards to our NRC License I have the following comments to offer:

We are asking for a one year storage only license, so within this year we will either reapply for a license or sell our gages.

Sincerely
Sandor Mangucky PE
Civil Engineer

Re: License Renewal #50-23296-01

Dear Ms. Prange:

I would like to amend our license for storage only. I was in a car accident in December. At this time I do not know when I will be able to resume my work.

Sincerely,

Sandor Manyoky, P.E.

Re: N.R.C. license renewal (50-23296-01)

Dear Ms. Prange:

This is our letter of intent to renew our N.R.C. license. Our application is category 3P. We presently have two Troxler 3411-B densometers. We may consider the purchase of another 3411-B gage in the future.

The renewal fee of \$670.00 is enclosed. Please let us know if you require additional information.

Sincerely,

Haas & Associates, Inc.
