Re: NRC Docket 40-8707

Dear Mr. Dalley:

During our October 2, 1978 meeting on the Energy Uranium in-situ pilot test, the question of the CDM Accu-Labs certification was raised. Attached for your information is a letter and inspection report from the Colorado Department of Health, certifying CDM Accu-Labs under the Safe Drinking Water Act. Please circulate this information as required, to determine if Accu-Labs data would be accepted by the Utah Department of Health. Mr. Wilson, from my office, will contact you Wednesday afternoon, October 11, to obtain your decision.

Very truly yours,

Jim V. Rouse
