

DOCKET NUMBER

PROPOSED RULE

PR-21(43FR48621)

(3)

November 16, 1978

Mr. W. E. Campbell, Jr.
Office of Standards Development
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Reference: 10CFR Part 21

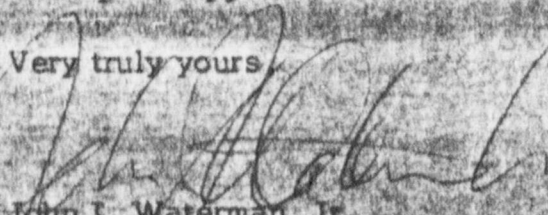

Subject: Amendments effective 10-19-78

Gentlemen,

The Elgar Corporation, which is a supplier of inverters and associated equipment for Safety-Related Nuclear Applications, wholeheartedly endorses the subject amendment.

This amendment will save considerable cost and time while resulting in no degradation in the quality of the equipment provided. In some cases, it could result in superior equipment due to the greater availability of suppliers it creates.

Very truly yours,

John J. Waterman, Jr.
Vice President, Marketing
