Subject: Editorial Corrections for License Amendment Request Regarding  
Changes to Setpoints for Anticipatory Reactor Trip System  
Arming, Reactor Protection System High Pressure Trip and Pilot  
Operated Relief Valve Trip (TAC No. 66727)

Gentlemen:

The application for license amendment submitted by Serial No. 1464 dated February 1, 1988, inadvertently omitted changes to Technical Specification pages which are supported by the submittal. Specifically, Technical Specification page 3/4 3-30c, Action 16 should be marked to show the proposed change in the Anticipatory Reactor Trip System arming level as 45 percent reactor power. The first paragraph of Technical Specification Bases page B 3/4 4-1a should be additionally marked to reflect the proposed Reactor Protection System high pressure trip setpoint of 2355 psig, consistent with other changes on that page. The pages reflecting these editorial corrections are attached and should replace the corresponding Technical Specification change pages transmitted by Serial No. 1464.

If you have any questions, please contact us.

Very truly yours,

Docket No. 50-346  
License No. NPF-3  
Serial No. 1496  
Attachment

EDITORIAL CHANGES TO  
APPLICATION FOR AMENDMENT  
TO  
FACILITY OPERATING LICENSE NO. NPF-3  
FOR  
DAVIS-BESSE NUCLEAR POWER STATION  
UNIT NO. 1

Attached are editorial changes to the License Amendment Application regarding Changes to Setpoints for Anticipatory Reactor Trip System Arming, Reactor Protection System High Pressure Trip and Pilot Operated Relief Valve Trip, previously submitted on February 1, 1988 (Serial No. 1464).

The proposed editorial changes (submitted under cover letter Serial No. 1496) concern:

Technical Specification Table 3.3-15, Anticipatory Reactor Trip System Instrumentation, Action 16  
Technical Specification Bases Sections 3/4.4.2 and 3/4.4.3, Safety Valves

For:   
D. C. Shelton, Vice President, Nuclear

By:   
T. J. Myers, Nuclear Licensing Director
