EDWIN I. HATCH NUCLEAR PLANT UNIT 2
DIFFERENTIAL BUILDING SETTLEMENT

Gentlemen:

The Plant Hatch Unit 2 Technical Specifications were issued with a specification on settlement of Class I structures (3/4.7.8). Table 3.7.8-1 of that specification contains columns for total and differential settlement, with a note for the column of allowable differential settlements which states the values are to be established and reported to the Commission by November 1, 1978.

Information currently available indicates that some of the values to be specified may not be available in final form until after November 1, 1978. Consequently, in order to provide for a review of the final values, we plan to revise our submittal schedule so that the allowable differential settlements will be reported to the Commission by December 1, 1978. Please let us know if this schedule revision is not acceptable.

Yours very truly,

Chas. F. Whitmer
