Dear Mr. MacDonald:

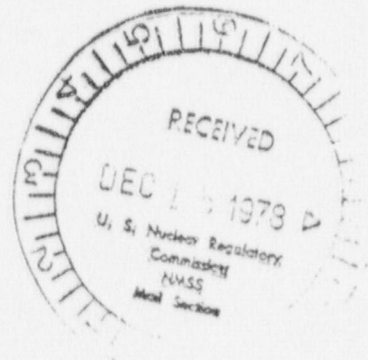

The Tennessee Valley Authority (TVA) petitioned the U.S. Nuclear Regulatory Commission to issue an amendment to NRC Certificate of Compliance No. USA/6722/B for the BS-33-180 radioactive waste cask on July 21, 1978. The requested change involved a decrease in the number of bolts used to secure the cask cover.

TVA wishes to withdraw this petition at this time. Please contact Ben Rogers, of this division, at (615) 755-3558 or 854-3558 (FTS) if you require additional information.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
