MAY 1 - 1986

MEMORANDUM FOR: Region III Files
THRU: D. J. Sreniawski, Chief, Nuclear Materials Safety, Section 2
FROM: J. R. Mullauer, Radiation Specialist
SUBJECT: MIRTONE INDUSTRIES LIMITED, NAPERVILLE, ILLINOIS 60540
(LICENSE NO. 12-21478-01)

The licensee was contacted by telephone on April 25, 1986, to determine program status. Syd Cottrell (authorized user) informed the inspector that the warehouse in Naperville, Illinois is no longer used or owned by Mirtone Industries. He further stated that to his knowledge, no radioactive material (smoke detectors) were ever stored in the Naperville location. The company now owns a warehouse at 2245 Kenmore Avenue, Tonawanda, New York 14207, however, no radioactive material is stored there either. The inspector recommended that they terminate their Region III license as soon as possible, Mr. Cottrell agreed. Mr. Cottrell was informed that until termination action is taken, the license would be rescheduled for inspection in April 1987.

NOTE FOR: License 31-24822-01E

FROM: Glenda Jackson
License Fee Management Branch

The \$120 amendment fee paid on 12/3/86 is the correct fee for the issuance of License 31-24822-01E in accordance with C. James Holloway's March 27, 1987 Memorandum to Files. The new license replaces License 12-21478-01.

MEMORANDUM FOR: Files

FROM: C. James Holloway, Jr., Chief
License Fee Management Branch, RM/A

SUBJECT: FEE FOR NEW LICENSES ISSUED BY NMSS/
REGIONS FOR ADMINISTRATIVE REASONS

The NMSS materials license numbering system is designed to use a numerical state code as the first two digits of the license number. If a licensee moves to a different state, the Licensing staffs issue a new license in order to accommodate the state code appropriate for the new address, and the original license is terminated. If a licensee moves within a state, the existing license is amended. In both cases, an amendment fee is assessed in accordance with 10 CFR 170. An amendment fee is assessed when a new license is issued for the interstate move because

1. the Licensing staffs have informed us that the new licenses are issued to administratively maintain the correct state number designation for the licensee's new address, and
2. the technical review effort required to issue the new license for the interstate move is the same as that required to amend an existing license to reflect a licensee's intrastate move.

Therefore, the correct fee for the issuance of the new license is the appropriate amendment fee for the fee category or categories assigned to the original license, except as follows:

1. If the licensee requests an amendment to upgrade the scope of the licensed program in addition to a change of address, the appropriate application fee is required for the category being requested;
2. If the address change is for mailing purposes only and does not affect the authorized place of use, and if no other changes are requested, a fee is not required in accordance with William O. Miller's October 30, 1980 memorandum to Vandy Miller; and
