Docket No. 70-1100

Combustion Engineering, Inc.
ATTN: Dr. Paul McGill
Vice President - Nuclear Fuel
Nuclear Power Systems - Manufacturing
P. O. Box 500
Windsor, Connecticut 06095

Gentlemen:

Subject: Inspection No. 70-1100/88-02

A routine safety inspection of your Radiation Protection Program was conducted on January 25-29, 1988. This inspection was conducted to review two areas:

- i) Your actions in response to NRC Confirmatory Action Letter (CAL) No. 87-14, dated October 27, 1987; and
- ii) The status of your Radiation Protection Program upgrades.

Specific improvements were noted in the contamination levels in the Pellet Shop and the Respiratory Protection Program.

Weaknesses continued to be identified in your air sampling program and the adequacy of the radiation protection staff. These weaknesses are discussed in the enclosed inspection report. Further management attention to these areas may be warranted.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:
William J. Lazarus

Ronald R. Bellamy, Chief
Facilities Radiological Safety
and Safeguards Branch

Enclosure: NRC Region I Inspection Report Number 70-1100/88-02
