Mr. Clemens J. Heltemes, Jr., Chief
Standardization Branch
Division of Project Management
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

SUBJECT: Amendment to Application for Two-Year Extension of the
Preliminary Design Approval for RESAR-41

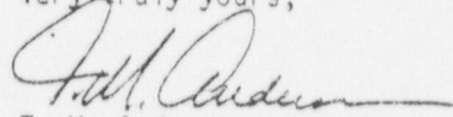

Dear Mr. Heltemes:

Enclosed are sixty (60) copies of Amendment 25 to RESAR-41, the Reference Safety Analysis Report documenting the Westinghouse 3800 Mwt Nuclear Steam Supply System. Amendment 25 is submitted in response to the December 21, 1978 request for additional information from Mr. P. O'Riley of the NRC Standardization Branch to Mr. D. H. Rawlins of Westinghouse, Standard Plant Licensing, concerning Appendix 3B of RESAR-41. Appendix 3B addresses the regulatory matters in Category I, II, III and IV, according to the Commission's August 22, 1978, policy statement on standardization. Westinghouse submitted Appendix 3B as Amendment 24 on December 15, 1978, with a request for a two-year extension of PDA-3, the Preliminary Design Approval for RESAR-41.

Amendment 25 provides the additional information requested, which is interface in nature, for specific Appendix 3B regulatory matters that are not in Westinghouse scope.

If you have any questions or comments concerning this submittal, we will be pleased to meet with you at your convenience.

Very truly yours,

T. M. Anderson, Manager
Nuclear Safety Department
